WORK EXPERIENCE

Experian Automotive **December 2025 – Present**
Data Science Analyst *San Diego, CA*

- Architected and built a production AI entity resolution platform using Python, AWS Bedrock, AgentCore, and NetworkX to unify 1M+ automotive business records across 11 enterprise systems. The platform combines LLM reasoning and web research to resolve complex business relationships that traditional fuzzy matching struggles with, processing 20B+ tokens to date. It replaces thousands of hours of manual mapping with a centralized identity graph used across the analytics team for BI, forecasting, CRM, and customer analytics.
- Engineered Python/AWS Glue ETL pipelines integrating enterprise data sources, third-party APIs, and cross-account Redshift environments to power entity resolution and downstream analytics.
- Built a self-service AWS ECS Fargate deployment platform enabling a 16-person analytics team and AI agents to deploy React dashboards and APIs in under 10 minutes using automated CodeBuild and ECR workflows.
- Developed a dealer-level credit intelligence framework reconciling 130M+ credit pulls across 40,000+ dealers and resellers, linking lender activity with dealer and vehicle sales data to identify revenue opportunities.
- Spearheaded AI adoption strategy for the team, establishing governance guardrails as engineers adopted Claude Code with AWS access; presented production AI applications to 100+ attendees at a Lunch & Learn.

Circana **September 2024 – December 2025**
Market and Competitive Intelligence Analyst *San Diego, CA*

- Engineered competitive monitoring pipelines using Python, Selenium, Playwright, BeautifulSoup, and the OpenAI API to collect and analyze 4,000+ media items and 3,000+ job postings across 10 competitors.
- Developed an LLM-powered Python pipeline to crawl 50K+ competitor web pages, extract market claims, and structure value propositions for competitive benchmarking and messaging analysis.
- Analyzed competitor hiring trends, content themes, and messaging shifts, presenting quarterly findings to executive leadership on where competitors were investing and how their positioning was changing.
- Built a React platform centralizing competitive intelligence, AI-generated insights, and a database of 250+ competitor value propositions, with dated claims, screenshots, and source URLs for team-wide access.

OpenBrand (Gap Intelligence) **March 2023 – September 2024**
Market Research Analyst *San Diego, CA*

- Owned competitive and market intelligence for the multifunction printer (MFP) category, the company's highest-grossing category, overseeing client-facing research and reporting for 20+ client companies.
- Produced weekly market intelligence reports and spotlight videos, quarterly research papers, and biannual client presentations covering product launches, pricing, M&A, financial performance, and competitive positioning.
- Engineered a Python/AWS pipeline to monitor product certifications across 10+ product categories, uncovering early signals of upcoming product launches and giving analysts a competitive intelligence advantage.

EDUCATION

University of California, San Diego **September 2022**
B.S. Cognitive Science, Specialization in Human Computer Interaction (HCI) *San Diego, CA*

SKILLS

Python; SQL; React; NetworkX; Selenium; Playwright; BeautifulSoup; AWS (Glue, Step Functions, ECS, Lambda, S3, EC2, Redshift, Bedrock, AgentCore); Prefect; LLM APIs; AI Agents; ETL; CI/CD (CodeBuild, ECR); Claude Code; Git/GitHub
